EDUCATION

University of Toronto (St. George)

Toronto, ON | June 2026

HONOURS BACHELORS OF SCIENCE IN COMPUTER SCIENCE, 3.59 CGPA

Coursework: Introduction to Software Engineering; Machine Learning; Software Design; Artificial Intelligence; Business of Software; Computer Network Systems; Data Structures and Analysis; Operating Systems

Highlights: Dean's List Scholar (2022-2023), selected for the Arts & Science Internship Program's first cohort and chosen for the ASIP Mentorship Program, offering professional industry-related courses and strong professional development and experience through courses/projects in partnership with IBM

WORK EXPERIENCE

VEEVA SYSTEMS | SOFTWARE ENGINEER INTERN

Toronto, ON | May 2024 – April 2025

- Effectively collaborated on **enterprise-level, multi-tenant cloud SaaS** solutions within active **AGILE** development sprints
- Executed across multiple customer-facing features on key **database management, data model changes, and API design** in **Java/MySQL**
- Fully implemented vital **backend services, database triggers**, and handling of **complex user actions**
- Developed **reusable UI components & Controls, page routers, and full-featured user actions** in **React Redux & TypeScript**, utilizing **RTKQuery** to vastly improve efficiency
- Contributed to generating **Grid View Controls of customer tabular data** and implemented multiple **row and column user actions**
- Investigated slow MySQL query execution times in production code during upgrades, **avoiding increases in customer downtime by at least 10%**
- Conducted **cross-team impact analyses**, consisting of investigation, **refactoring libraries** and **omitting security vulnerabilities**

PROJECTS & EXPERIENCE

GEN-AI PREDICTOR | TEAM LEAD

PYTHON (SKLEARN, PANDAS, NUMPY)

- A project to conduct **Natural Language Processing (NLP)** on student-answered surveys using a variety of **Machine Learning (ML)** models including Decisions Trees, Naive Bayes, **Neural Networks**, and **Random Forests (sklearn)**
- Implemented **training, hyperparameter tuning, unseen data testing** and analysis for a final **98%/94%/88% accuracy** on Training/Validation/Test Datasets respectively
- Lead** targeted, engaging, and **concise meetings** with **acute problem resolution** as **Scrum Master**
- Implemented thorough **data pre-processing and cleaning (pandas, numpy)** of complex surveys with long-text **natural language answers** with both **Bag of Words (BoW)** and **TF-IDF** approaches

PARK MINDFULNESS | BACKEND ENGINEER

DJANGO, SQL, AWS, GITHUB ACTIONS

- A project developed under **Ontario Parks** in an **AGILE (Git)** environment to provide a platform for users to engage in context-specific guided outdoor mindfulness/meditation sessions
- Collaborated on the creation of all **Django Models, SQL database queries**, and frontend **REST API communication**
- Successfully hosted the web application using **AWS (EC2/CodeDeploy)** and **Railway**, and created a **CI/CD DevOps** environment for project development
- Established an **automated testing/deployment** environment using **GitHub Actions** for ease of future development

SKILLS

- Languages: **Java, Python, JavaScript**, TypeScript, **SQL**, C/C++, HTML/CSS, Haskell
- Frameworks/Libraries: **sklearn**, MySQL, Node.js, React Spring, Django, AWS, GCP, Linux, Git, Spring, JSON, PyTest, jQuery, JUnit, Mockito, Jest
