

bonzai

Financial control for businesses and households. Spend **wisely**, control **confidently**.

One Account, Many Hands

Across the Gulf, **businesses** hand cards to **employees**; **households** delegate spending to **domestic staff and family**, but control rarely follows.

SMEs - SAM - Qatar

~8k

Households - Qatar

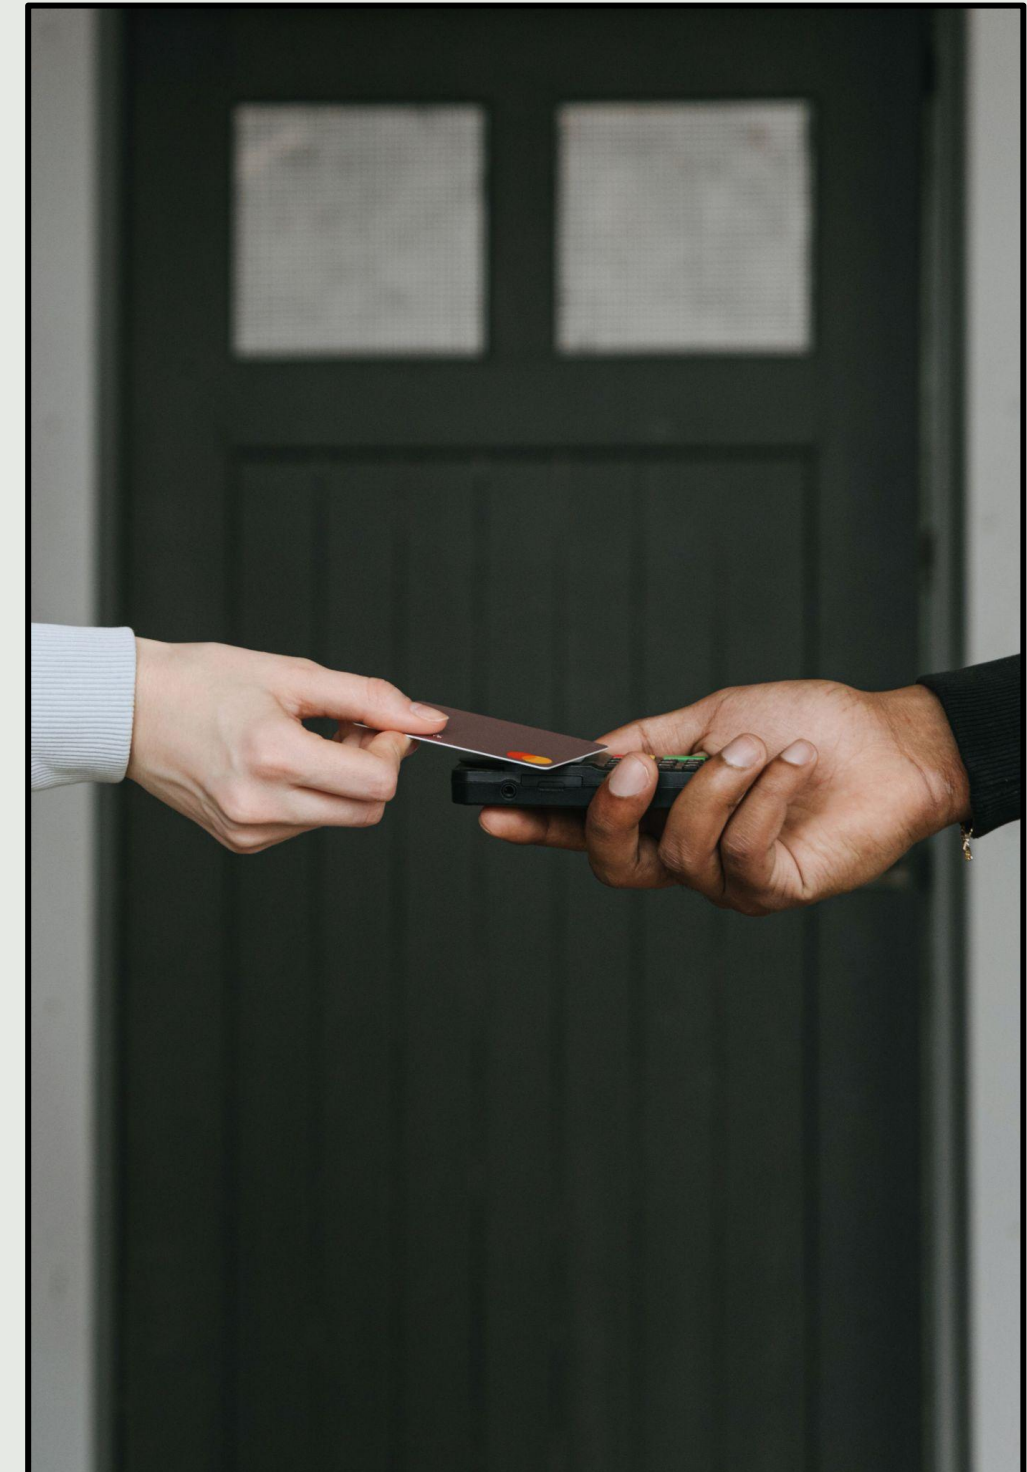

~550k

SMEs - SAM - GCC

~375k

Households - GCC

~14.5m

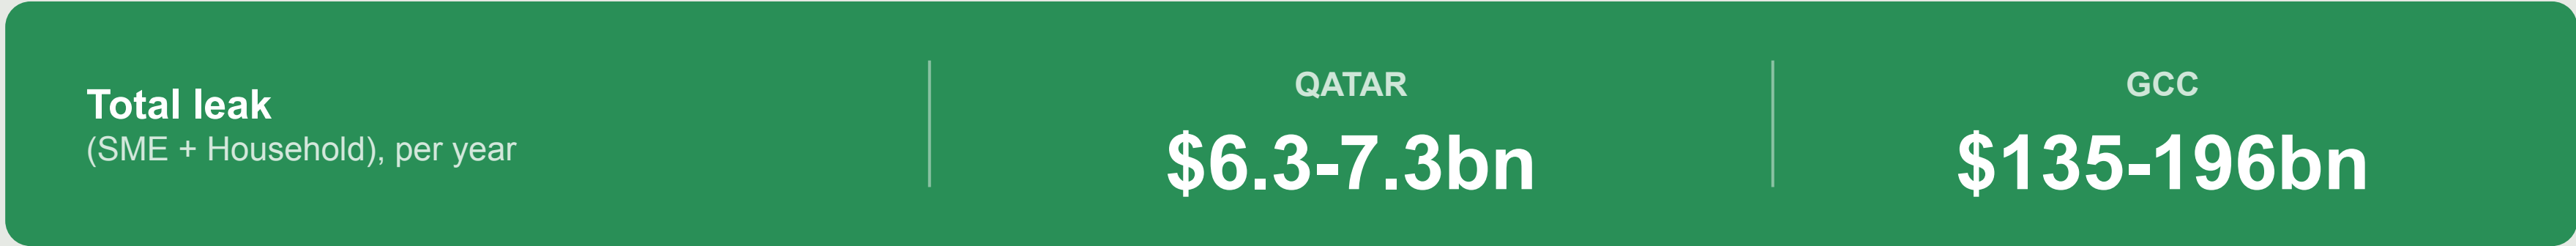

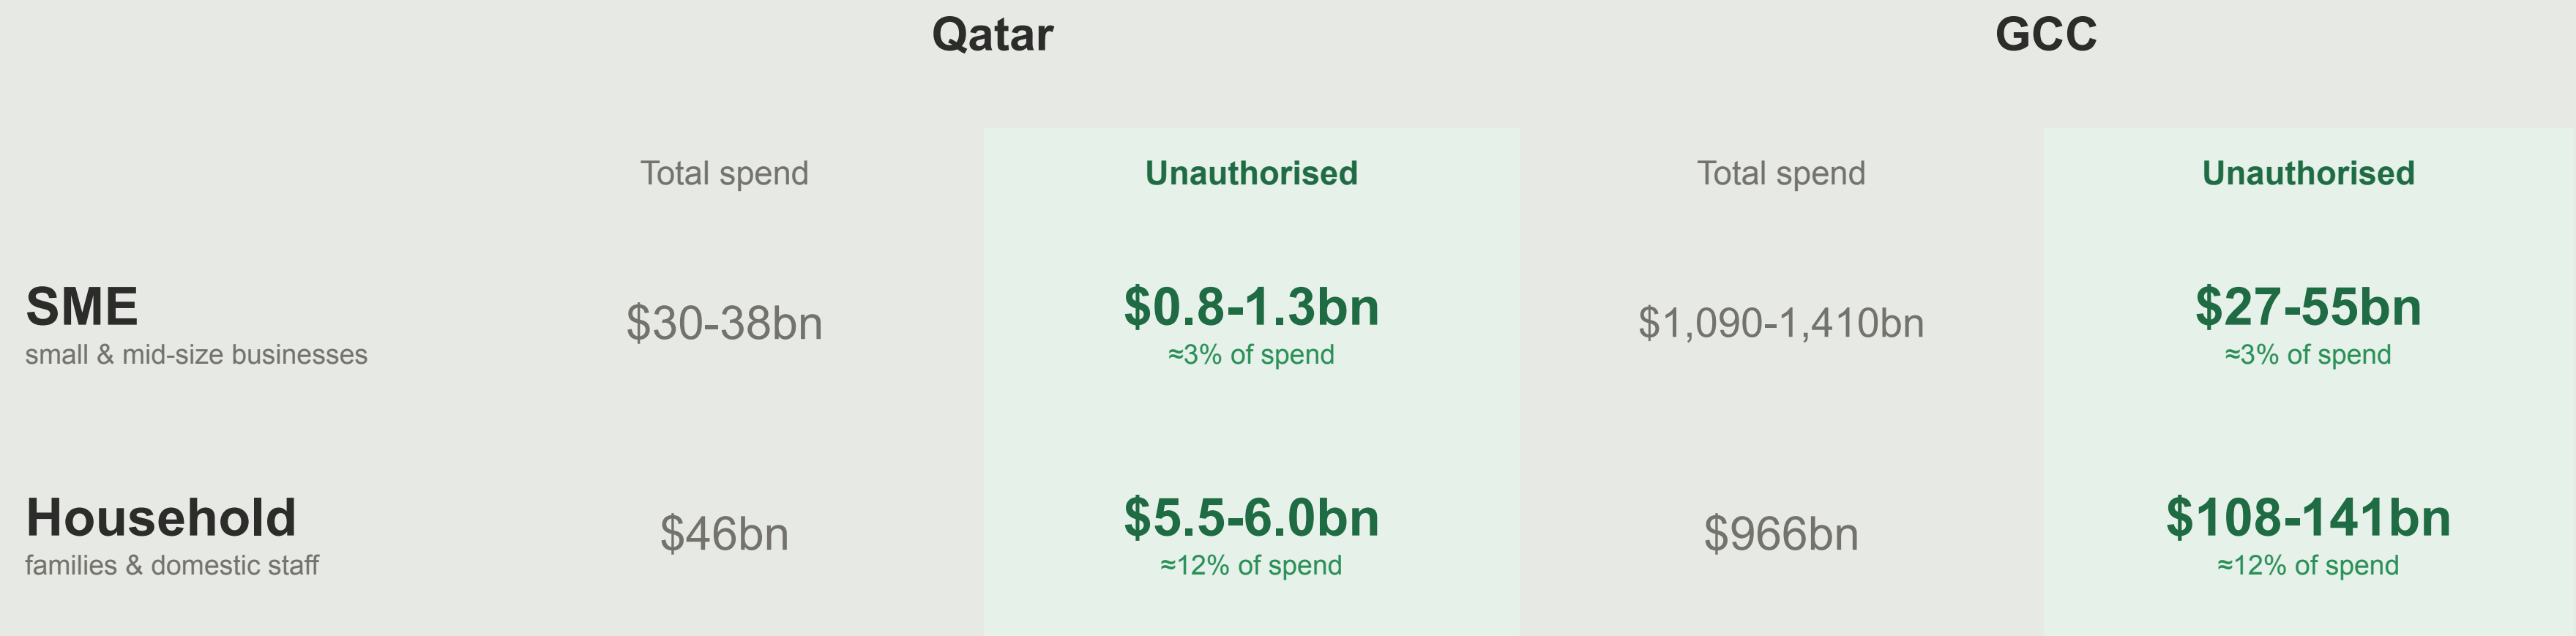

**Today's tools can track delegated spending,
but none of them can control it.**

Unauthorised Spending

SME estimated using the ACFE occupational-fraud benchmark; Household using the cash-reservoir method.

How Bonzai works

Enforced

Hard limits at authorisation

Spending, merchant category, and singleton vendor rules are used to decline unauthorised transactions in real-time at Point-of-Sale

Hierarchical

One root, many leaves

A single account holder issues cards to employees, family, and dependents; each leaf with its own rules. The root sees and governs everything.

Verified

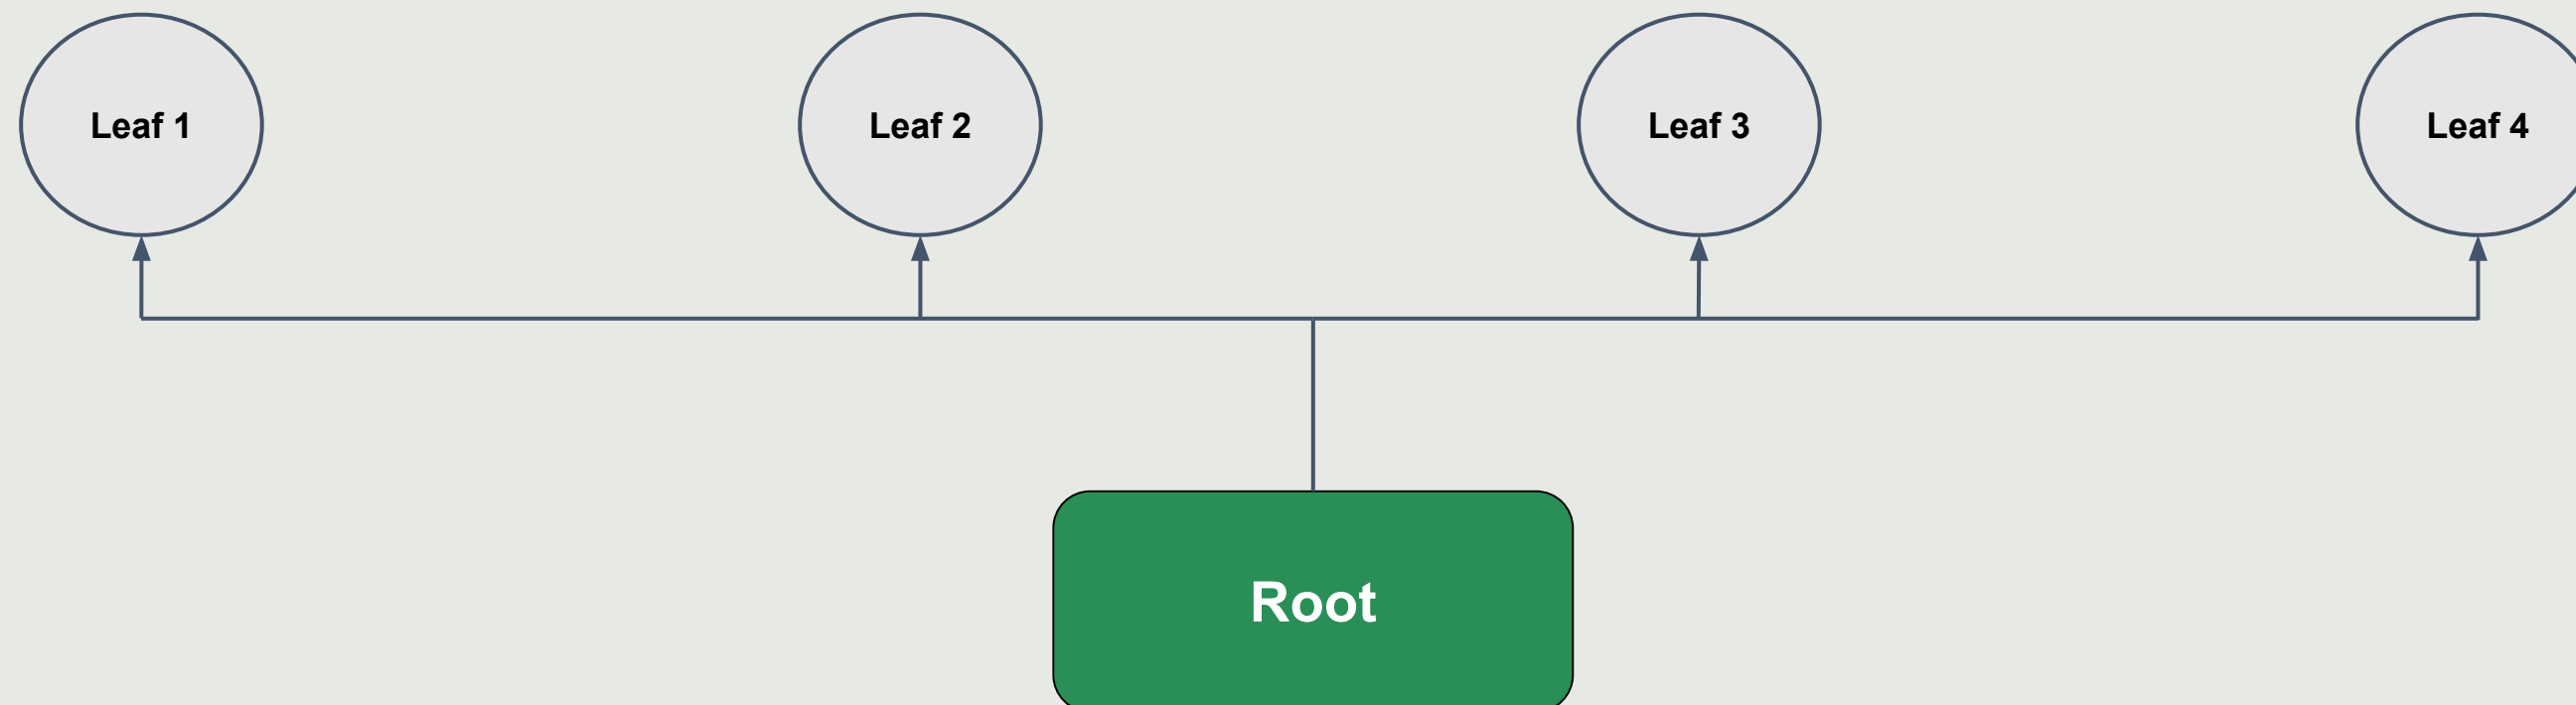

Reconciled after the fact

OCR cross references receipts and transactions for discrepancies, alerting the root the moment a receipt and payment don't reconcile.

Insights

Personalized AI insights

AI-powered reports to identify spending patterns and potential areas for savings. All for you to hit your financial goals.

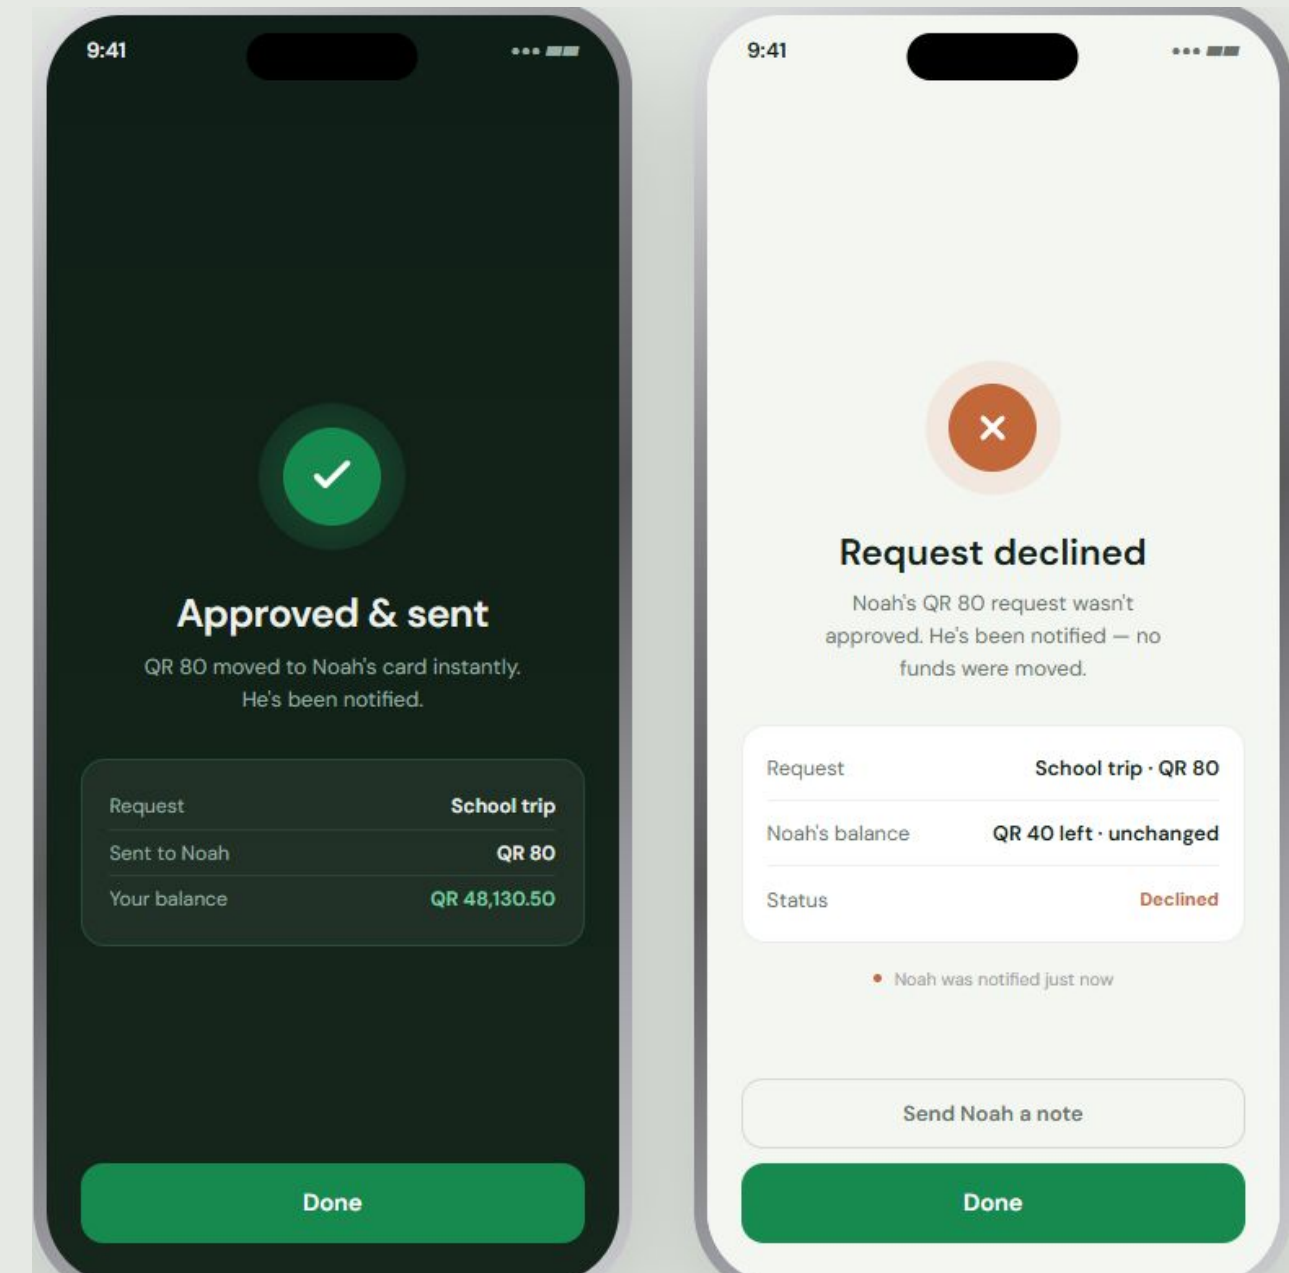

Control through Authorisation

At Point-of-Sale:

1. Card payment initiated, in-store or online
2. Authorisation request hits Bonzai's rules engine
3. Spend limit, category (MCC) & merchant checks run
4. **Out-of-policy payments declined instantly**
5. Approved spend logged to the root account
6. Receipt capture + OCR reconciles after the fact

Decision Speed:

In Real-time

Real-time Payment Authorisation

Qatar's Opening

Tech Enablement

- **BaaS Maturity:** NymCard (QFC-2024) - card issuing, payment processing and BIN sponsorship.
- **Local Hyperscalers:** MS Azure, GCP servers.
- **PCI-DSS 4.0, built-in:** Tokenised card security.
- **AI at its Best:** OCR & habit-based prediction.
- **Agentic Coding:** a lean team ships and iterates faster than ever.

National Push

- **QCB sandbox:** free year-round, Regulatory / Express track
- **Direct card-rail access:** FinTechs plug straight into NAPS/QPay.
- **QFC:** 100% foreign ownership, full profit repatriation
- **QNV 2030 strategy:** Push to a cashless, digital economy (currently ~92% contactless)

Market Validation

- **Category proven:** Alaan (2025, horizontal-adjacent) raised \$48M in Series A
- **Profitable at scale:** Qashio (2021, horizontal-adjacent) runs at 800% YoY growth (backed by Saudi's Alinma Bank).
- **In Qatar:** Xpendless, Karty
- **MENA's Highest Sector:** roughly 58% of all regional startup capital in 2025
- **Still early:** GCC fintech is just 1–2% of banking revenue, vs 3–5% in the US/UK..

Buildable, backed, and proven; with Qatar's SME beachhead left unclaimed.

~8000

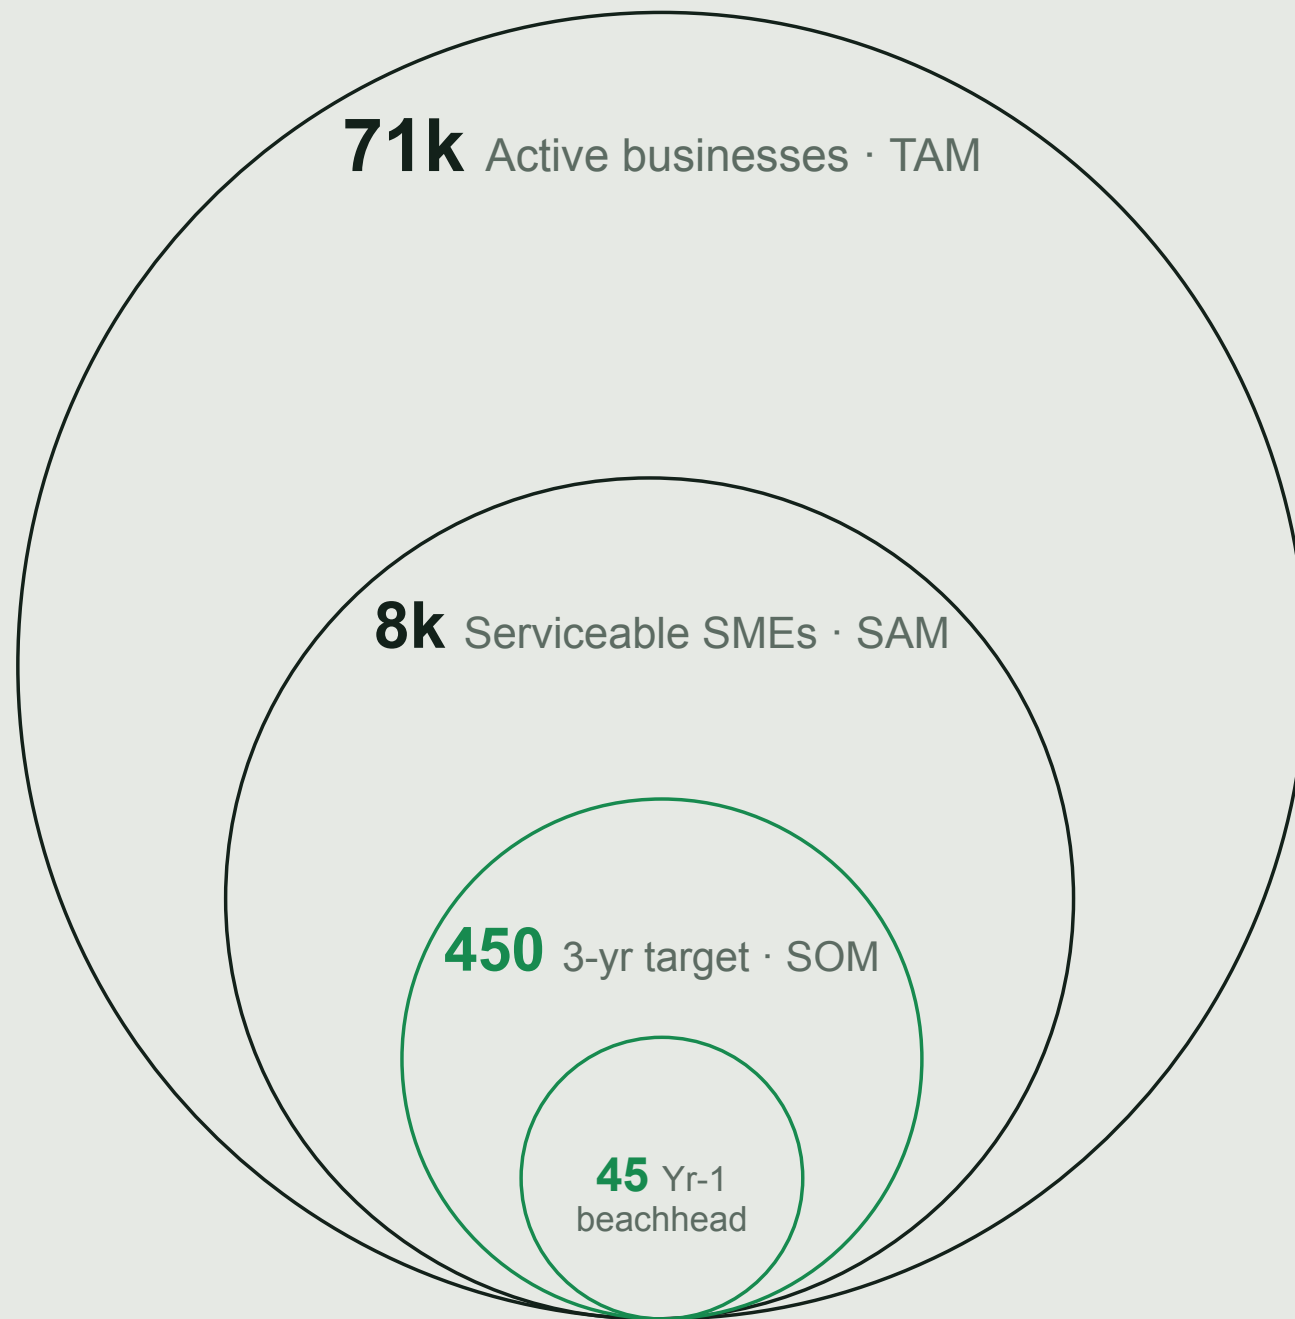

Serviceable SMEs in Qatar needing delegated multi-card control.

~550k

Qatar households - family & domestic-staff spend control (B2C upside).

~26×

GCC expansion - a serviceable B2B & B2C market roughly 26× the size of Qatar.

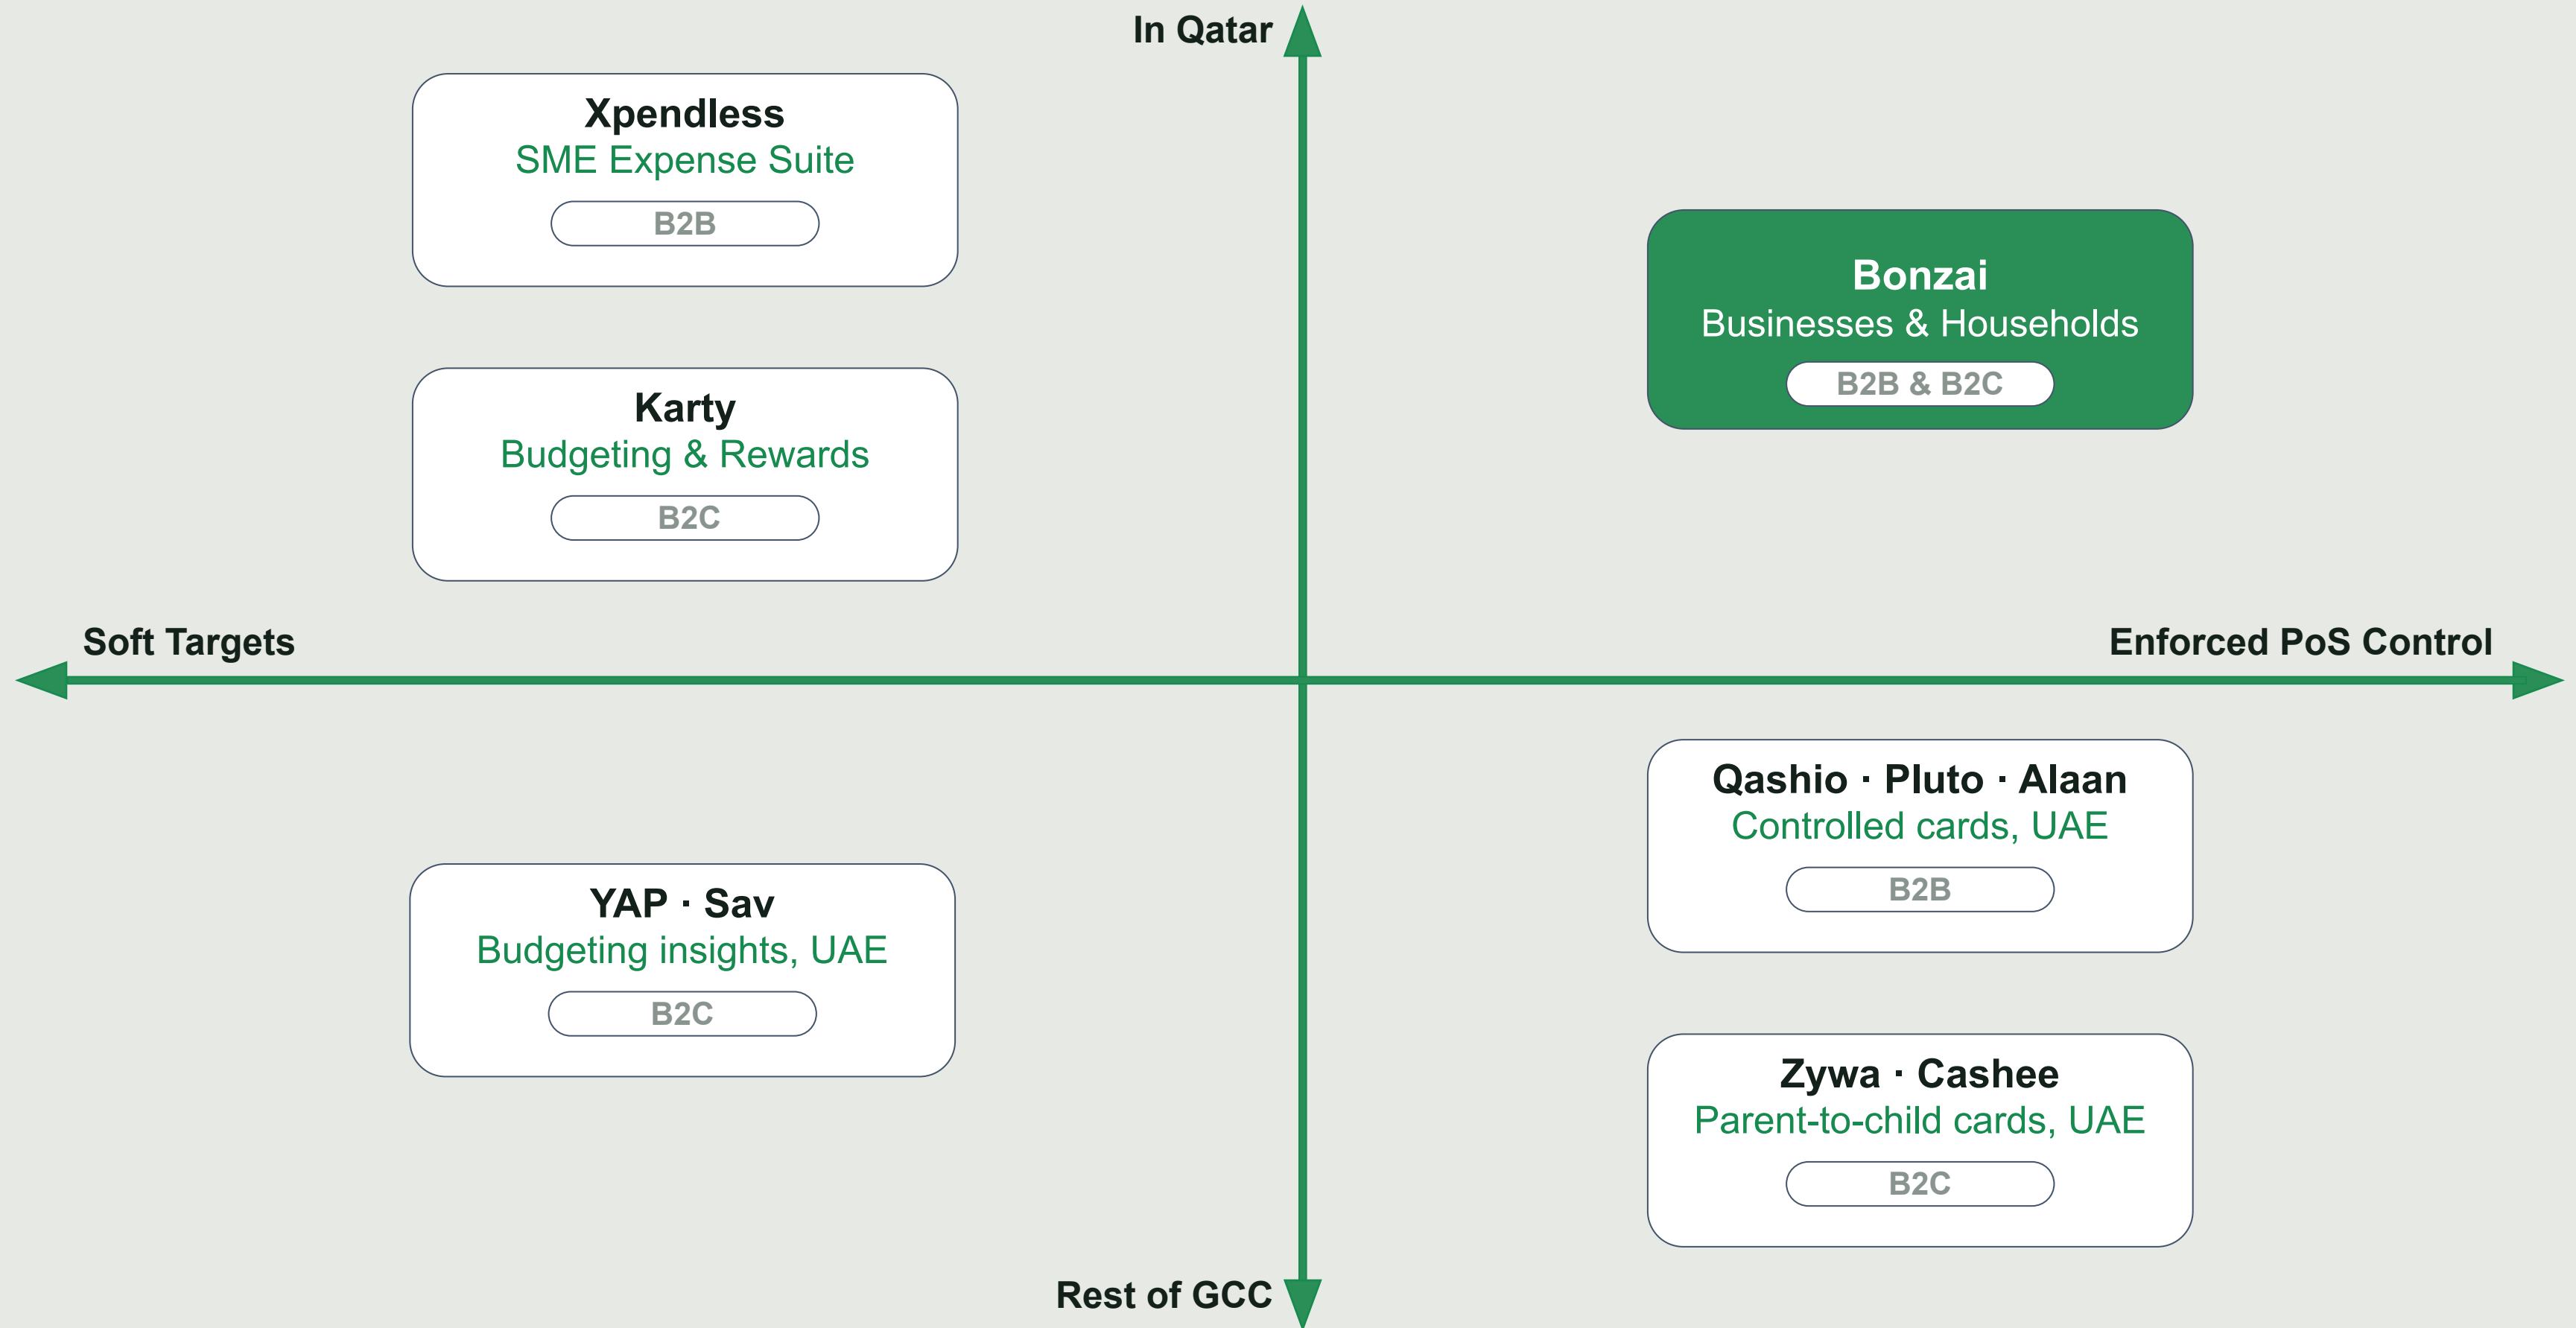

~5,000
active cards

At ~11 active cards per SME across 450 businesses.

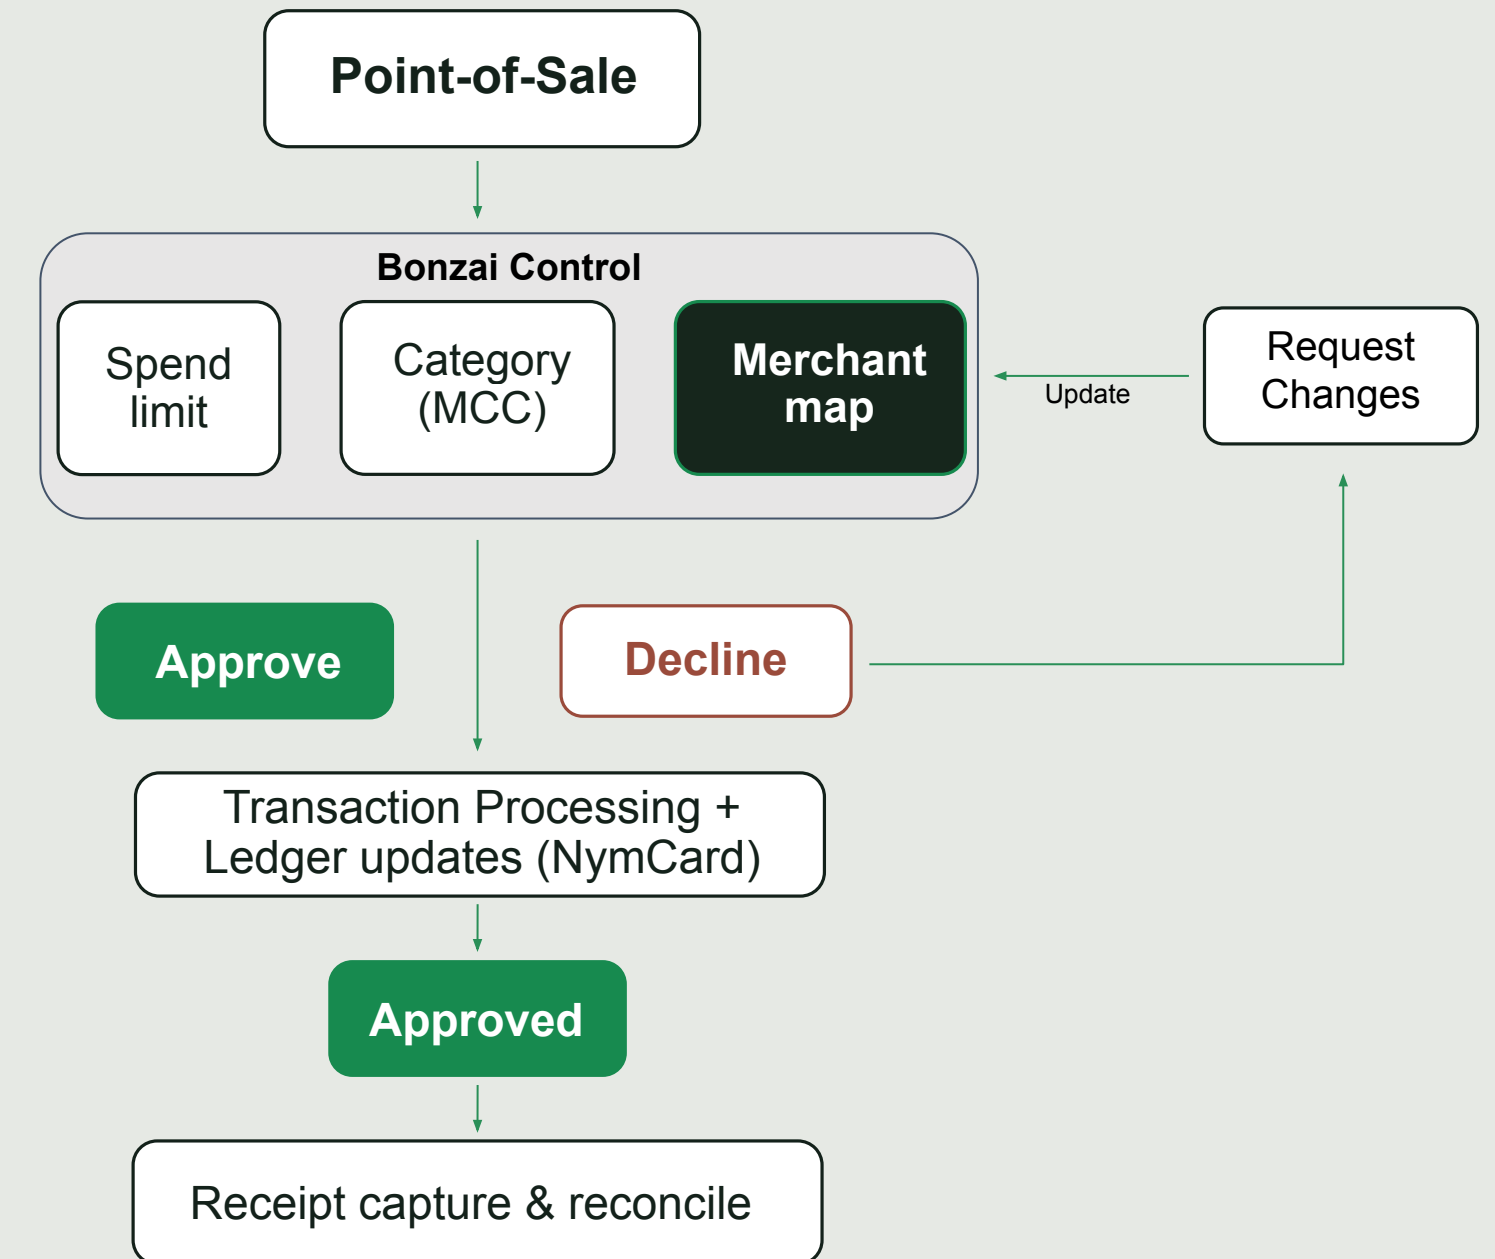

~QAR 4.2M
annual run-rate by Year 3

Real-time Payment Enforcement Flow

- Control is **enforced at Point-of-Sale**; not as an after-the-fact report.
- The **merchant map** links Qatar's businesses to **our proprietary identifiers**, enabling personalised vendor control.
- **Bi-directional user flow** between roots and leaves for quick access funds and vendor whitelists.

Revenue Models (B2B)

1. Subscription - recurring SaaS, billed per account each month

*Pricing Subject to Change upon Market Testing
*Functionality Subject to Change based on Technical Capabilities

Free

QR 0

- 1 root + 1 leaf
- Digital card
- Real-Time Limits and Category (MCC) blocking
- Dashboard + OCR for all users

Pro

QR 149/mo

- Everything in Free, Plus:
- Up to 2 roots, 10 leaves
- Vendor Whitelisting
- AI Insights for spending patterns
- CSV Export

Business

QR 399/mo

- Everything in Pro, Plus:
- Up to 5 roots, 30 leaves
- Advanced Analytics
- ERP Integration

Enterprise

Bespoke

- Everything in Business, Plus:
- Custom Hierarchy
- Unlimited Cards + custom controls
- Custom Accounting
- Dedicated SWE + CSM
- APIs

2. Interchange

A **share of interchange** on every card payment

Visa / Mastercard set the rate; our net cut is set by NymCard + sponsor-bank program - estimated floor of 0.5%

3. FX Margin

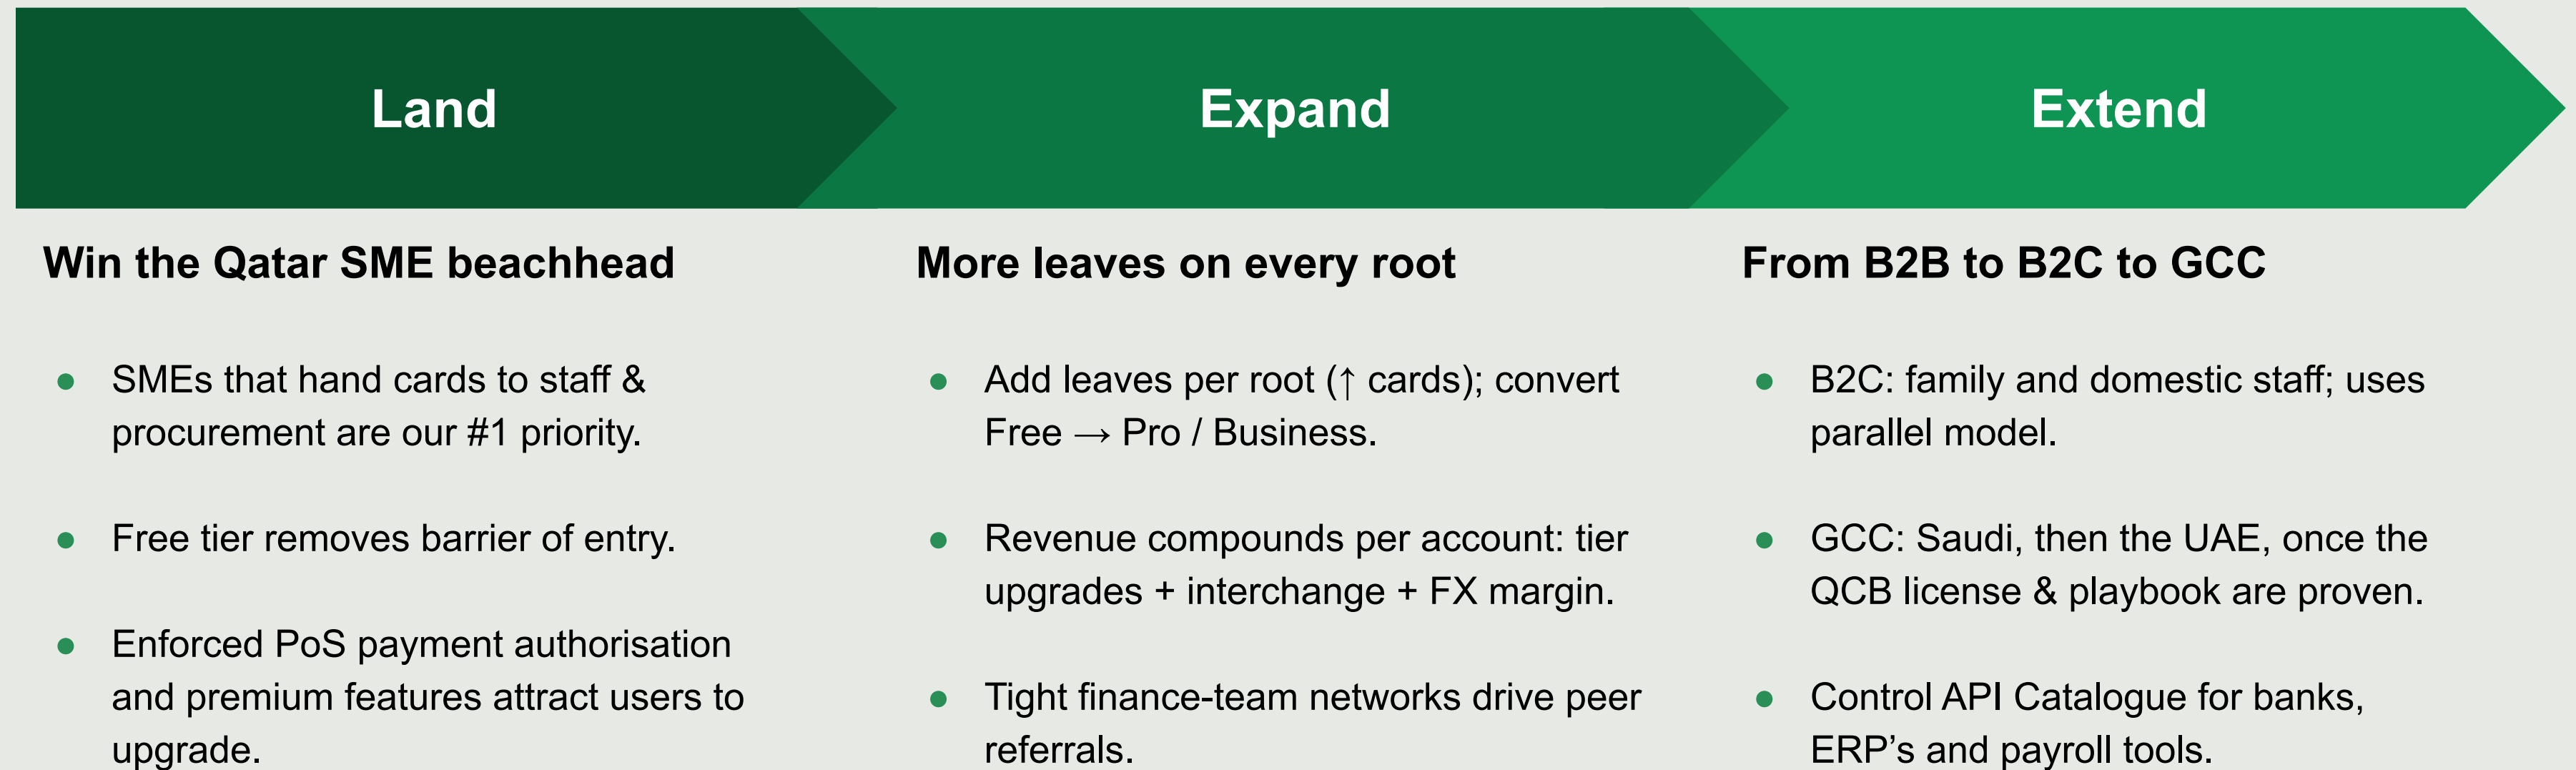

A **~1.5% markup** on foreign-currency spend (interbank rate + margin).

Domestic QAR spend stays free. We monetise cross-border, where a markup is expected

Example - Business Tier: 20 Cards, 60K payments per card (6K interchange + 2.7K FX) + 4.8K subscription = ~13.5K QR / SME / Year
